### Program Philosophy and Core Values

YMCA Before & After School programs strive to provide a safe, secure and supportive environment that gives families peace of mind when you cannot be there yourself.

- We believe that a child's experience is dependent on family life and community life; YMCA programs strive to support the entire family with a variety of programming and character based curriculum.
- We believe in focusing on your child's abilities rather than their shortcomings.
- We believe that when youth are exposed to consistent displays of positive character traits, they will develop a healthy self-esteem and a willingness to help others.
- We believe that by supporting your local school, your child will experience success. Our programs offer a holistic approach to your child's development by offering activities that strengthen, expand and provide real life context to information learned in the classroom.
- We believe that building strong kids and strong families will strengthen the foundation of our communities.

### Youth Development

The Y is guided by four core values: caring, honest, respect and responsibility. These values are infused in Y programming, with a focus on building good character and developing youth from cradle to career.

### Enrichment & Curriculum

**SCALED Learning™**, the Y's holistic before and after-school curriculum, presents kids with new challenges as they reach each stage of their development. SCALED Learning™ helps kids grow in the classroom and out in the world through engaging in STEM, hands-on arts, literacy, career-connected learning, diversity and global education, social development, and fun! Kids who participate in the Y's before and after school programs expand the school day through active play with classmates and curriculum that augments what they're learning in school. Discovering the world is fun and safe with the experts on helping kids grow and learn in spirit, mind, and body.

#### SCALED LEARNING™

**STEM (S):** STEM projects engage kids in science, technology, engineering or math to practice academic skills, critically think and promote investigation, inquiry, and discovery.

**Career-Connected Learning (C):** Kids explore career paths through integrated lesson plans and get to know real professionals in industries like engineering, medicine, business, and education through classroom visits.

**Arts (A):** Kids engage in hands-on art projects which grow in complexity as they get older. They will explore a variety of art techniques and media as they discover ways to creatively express themselves.

**Literacy (L):** Literacy activities engage kids in reading aloud and discussion, creative writing, Reader's Theater, and word games to practice academic skills and promote expression.

**Education (E):** YMCA programs help students build confidence to become active learners both in and out of the classroom. From homework help to spellings bees and more, the Y helps kids love learning.

**Diversity & Global Learning (D):** Kids become good global citizens through cultural events and projects which explore diverse perspectives, ideas, beliefs, and customs.
